*Salt Manufacturing and Processing facility in the **Republic of Kosovo.***

Euroni Salt L.L.C, a leading Salt Manufacturing and Processing facility located in the Republic of Kosovo, has been operating successfully since 2003. With a strong commitment to quality and adherence to the latest food standards, our factory specializes in the production and processing of various salt products.

OUR FACILITY AND PROCESSES

At Euroni Salt, we take pride in our state-of-the-art facility that encompasses advanced machinery and cutting-edge technology. Equipped with washing, drying, iodization, grain separation, and packaging processing machinery, we ensure that every step is carried out meticulously to meet the highest food quality standards. Our facility is certified with ISO 9001, 22001, and HACCP, guaranteeing the utmost safety and reliability of our products.

WIDE RANGE OF SALT PRODUCTS

We offer a diverse range of salt products to cater to the varied needs of our customers. Our product portfolio includes Vacuum rock salt, Sea salt, Himalayan salt, Tablet salt, Nitrite salt, Tanning salt, and Dishwasher salt. In compliance with legislation, our food salt is iodized, ensuring the essential nutritional requirements are met.

DOMESTIC AND INTERNATIONAL REACH

Euroni Salt is dedicated to meeting the demands of both the domestic market and the International market. With our enhanced production capacity, we ensure a steady supply of high-quality salt products to fulfill the needs of our customers. Our investments in modern machinery in 2023 have further strengthened our efficiency and quality control, positioning Euroni Salt as one of the largest manufacturers and salt suppliers in the region.

At Euroni Salt, we are driven by a passion for delivering premium salt products and upholding the highest industry standards. With our expertise, dedication, and strong partnerships, we aim to continue serving as a leading force in the salt manufacturing and processing industry, both locally and internationally.

WHY CHOOSE US

Euroni Salt Factory

At our salt factory, we take immense pride in delivering the highest quality salt products to our customers. With our unwavering commitment to excellence, advanced production techniques, and a deep understanding of our customers' needs, we stand out as the premier choice for all your salt requirements. Here's why choosing us is a decision you won't regret:

PREMIUM QUALITY

Our salt is derived from pristine sources, carefully selected for their mineral content and purity. Through meticulous processing and stringent quality control measures, we ensure that every grain of salt that leaves our factory meets the highest standards of quality and taste.

EXPERTISE AND TRADITION

With decades of experience in the salt industry, we have honed our craftsmanship and perfected our techniques. Our team consists of seasoned professionals who possess extensive knowledge of salt production, ensuring that you receive nothing short of exceptional products.

STATE-OF-THE-ART FACILITIES

Our factory is equipped with cutting-edge technology and modern infrastructure, enabling us to efficiently extract, process, and package salt. We continually invest in our facilities to maintain a hygienic and controlled environment, ensuring the purity and integrity of our products.

DIVERSE PRODUCT RANGE

We offer an extensive array of salt products to cater to diverse preferences and requirements. Whether you need fine-grained vacuum rock salt, sea salt, or industrial salts, we have the perfect option to enhance the taste and presentation of your culinary creations.

COMPETITIVE PRICING

We offer competitive pricing without compromising on quality. We do this while exceeding your expectations in terms of quality and value.

A group of five workers wearing yellow hard hats and dark clothing are standing in a large, arched salt mine tunnel. The tunnel walls are rough and textured, and the floor is also made of salt. The workers are illuminated by bright lights, creating a dramatic scene with strong highlights and deep shadows. One worker in the center is holding a light, which is the primary source of illumination for the group.

*Euroni Salt L.L.C. is the **largest salt supplier** to the retail and industrial sector **in Kosovo** offering high-quality salt products at competitive prices.*

Vacuum Rock Salt

Vacuum rock salt, also known as purified rock salt, is a high-quality form of sodium chloride that is free from impurities and moisture. This salt is produced by a unique process that involves mining rock salt from underground deposits and then purifying it in a vacuum chamber. The result is a pure, crystalline salt that is perfect for a variety of applications. One of the main benefits of vacuum rock salt is its purity. Because it is produced in a vacuum chamber, it is free from impurities such as dirt, dust, and other contaminants that can be found in other forms of salt. This makes it ideal for use in food processing, where purity is essential for maintaining product quality and safety.

Vacuum rock salt is also known for its consistency. Because it is produced through a controlled evaporation process, the size and shape of the salt crystals are consistent, making it easy to measure and use in recipes. This consistency also ensures that the salt will dissolve quickly and evenly, which is important in applications such as brining and pickling.

Overall, vacuum rock salt is a versatile and high-quality salt that offers a range of benefits for food processing, water treatment, chemical manufacturing, and other applications. Its purity, consistency, solubility, and eco-friendliness make it a popular choice among manufacturers and consumers alike.

Since 2016, Euroni Salt L.L.C is a trusted partner and official distributor of Salinen Austria – the largest manufacturer of vacuum rock salt in Europe. Through such reliable partners and suppliers, Euroni Salt ensures high-quality salt end products, and sustainable production capacities thus fulfilling demand for Kosovo and the Balkans region.

Sea Salt

Sea salt is a type of salt that is extracted from the evaporation of seawater. It is a natural source of sodium, chloride, and various trace minerals, and has been used for centuries for culinary and medicinal purposes. In recent years, sea salt has gained popularity as a healthier alternative to traditional table salt due to its unique flavor profile and potential health benefits.

One of the primary benefits of sea salt is its mineral content. Unlike traditional table salt, which is heavily processed and stripped of its natural minerals, sea salt retains many of the minerals found in seawater, including magnesium, potassium, and calcium. These minerals are essential for proper bodily function, and can help regulate blood pressure, support bone health, and promote optimal nerve and muscle function.

Sea salt is known for its versatility. It can be used in a variety of cooking and baking applications, such as seasoning meat, vegetables, and seafood, as well as in marinades, sauces, and dressings. Sea salt can also be used in baking, particularly in recipes that call for a coarse or flaky salt.

EURONI Salt sources its raw sea salt from the southern end of the Adriatic Sea. The raw salt is taken to our production facilities and enters the processes of washing, drying, iodization, grain separation and finally packaging. Our production facilities are carefully monitored and fulfill the latest quality standards for food processing and production (ISO 9001, ISO 22001 and HACCP).

Tanning Salt

Tanning Salt for animal hides and skins

Industrial tanning salt for the manufacturing industry is a special salt intended to tan animal hide and skins.

Cleanses excess moisture on the skin and has antibacterial effects.

The main advantage of this salt is its special composition granulometry which is uniformly spread and bonds to the skin thus giving great results in bonding of the material. This salt is packed in 30kg bags.

PACKAGING	UNITS	TYPE OF PACKAGING
30kg	33 per pallet	Plastic Bag

Nitrite Salt

Nitrite salt gives delicious pink color to meat. It is essential for preserving the taste and color of the meat. Thanks to Nitrite, the meat stays refreshing, has color and consistency. Nitrite salt is recommended to be used in small quantities. Therefore, it is a special product for well-prepared meat. Nitrite salt is used in the processed meat industry.

The basis for this salt is high quality industrial salt that has 0.5% to 0.6% higher nitrite levels. This type of salt can not be used directly in the human diet.

Nitrite salt gives delicious pink color to meat. It is essential for preserving the taste and color of the meat. Thanks to Nitrite, the meat stays refreshing, has color and consistency. Nitrite salt is recommended to be used in small quantities.

Nitrite Salt in 25kg Plastic Bag

- Nitrite Salt for the meat industry.
- Not iodized.
- Contains Nitrite Natrium 0.5% – 0.6%.

Road Salt

Depending on the size of sea salt grain, the moisture content, the % of purity in sodium chloride, the method of application and presentation, our sea salt can classify the different qualities.

Sea salt for use on roads is considered the most environmentally friendly and natural salt that exists for the use of road salt and brine manufacturing for use in silos, for its high content of sodium chloride, its low % content in corrosive sulfates for the asphalt and low content in insoluble, prevents the appearance of typical sludge that clogs the filters and reduces cleaning time.
